Felted soap

Felted soap lasts longer, does not slip out of your hand and acts as a natural, soft exfoliator. Even better still, the felted alpaca cover is naturally antibacterial, odour resistant and breathable.

We use 100% Suffolk alpaca fibre from our own herd of boys. The soaps are made at the Natural Soap Company in Norfolk. If used in your soap, (see ingredients list on the band), palm oil is always from sustainable, fair trade sources.

How to use:

Felted soaps are a scrub and soap all in one. Run under water and rub to create lather. Wash hands, face and body as normal. When finished, gently squeeze, and leave to dry. Do not leave in water.
